Table 5: Data Extraction for Each Study

Extracted Data	Description
Study identifier	Unique identifier for each study.
Title	Title of the study
Data Extractor	Data of performing the extraction.
Authors	Names of the authors.
Year	Year of publication of the study.
Source	Source of publication of the study.
Database	Database in which the study was found.
Objectives	Main goal stated for the study.
Problem	Main problem considered in the study.
Concepts	Main concepts of health for software ecosystems.
Approaches	Approaches to evaluating the health of software ecosystems.
Key Areas	key areas for evaluating the health of software ecosystems.
Practices	Practices that influence the health of software ecosystems.
Metrics	Metrics used to measure the health of software ecosystems.
Tools	Tools that support the evaluation process of the health of software ecosystems.
